Mark Rosenkranz, Pacific Market Research

Table of Contents

EXECUTIVE SUMMARY	I
PART 1	
BACKGROUND	1
METHODS.....	1
<i>Weights.....</i>	2
<i>Limitations</i>	5
FINDINGS.....	6
<i>Technology check list</i>	6
Home computer access.....	6
Home Internet access	8
Access for residents with disabilities	11
Speed of home Internet access	12
Cell phone in the family	12
Cable service	14
<i>Home technology compared with 2000.....</i>	15
<i>Respondents without home computer or Internet access.....</i>	21
PART 2	
<i>Cable service.....</i>	23
Specific services received	23
Opinions about cable services	24
<i>What residents want</i>	31
City Cable Office.....	35
Public access television: Seattle Community Access Network (SCAN)	38
Seattle Channel	40
PART 3	
<i>Computer and Internet.....</i>	44
Access locations.....	44
Non-computer users	44
Non-computer users	45
Who are current computer users and patterns of changes	47
PART 4	
<i>Computer and Internet literacy and comfort</i>	51
Overall comfort	51
Comfort with specific tasks	54
PART 5	
Hours using a computer per week	61
How computer are used	63
<i>Human relationship to technology (incl. security & safety).....</i>	67
ISP service and cost	71
PART 6	
<i>Attitudes about computer and Internet access.....</i>	73
<i>Community involvement.....</i>	76
<i>Civic participation and e-government</i>	78
<i>Business and Economic Development</i>	85
CONCLUSIONS	87
NEXT RESEARCH STEP	88
SURVEY QUESTIONNAIRE	APPENDIX

Acknowledgments

The authors wish to thank those working on behalf of the City of Seattle for their careful and thoughtful contributions to this study. David Keyes and Delia Burke of the Department of Information Technology (DoIT) Community Technology Program spent countless hours working with the consulting team on the development of the interview instrument and then on advising the reporting of results. Tony Perez and Jill Novik of DoIT's Office of Cable Communications worked with us to create and improve the questions about cable service, and provided careful reviews of the final report. Rona Zevin, the Director of DoIT's Office of Electronic Communications, and members of the Citizens' Telecommunications and Technology Advisory Board provided valuable speculation on interpretation of findings and helpful feedback on the final report. Finally, we wish to thank the 1000 residents of Seattle who gave their time by participating in the survey to help city leaders, staff and others understand residents' technology uses and needs.
